

DOC314: Digital Skills for Higher Education ICT Exam Question Bank

Study Guide Compilation

Computer Hardware and Components

Question 6: Control, usage and allocation of different hardware components of the computer is done by:

- data bus
- application software
- **system software**
- address bus

Question 8: USB refers to:

- **a serial bus standard**
- a storage device
- a port type
- a processor

Question 11: In computer, BIOS stands for:

- basic inside outside storage
- binary input output support
- **basic input/output system**
- binary interrupt output service

Question 18: A is a physical docking point using which an external device can be connected to the computer.

- Hard disk
- RAM
- **Port**
- Expansion cards

Question 26: In information technology, LCD stands for:

- Low Cost Display
- **Liquid Crystal Display**
- Local Current Directory
- Liquid Cathode Display

Input, Output and Storage

Question 12: A joystick is primarily used to/for:

- draw pictures
- **computer gaming**
- enter text
- control sound on the screen

Question 13: A bar code reader is an example of:

- **input device**
- processing device
- storage device
- output device

Question 21: A person has taken a photograph using a digital camera. Subsequently, he shows the photograph to one of his friends using the display of the camera. In this scenario, the camera serves as a/ an:

- **Output device**
- Input & Output device
- Input device
- Communication device

Question 23: Information in computer read-only memory is stored by:

- Engineer
- user
- **manufacturer**
- programmer

Question 24: The device primarily used to provide hardcopy is the:

- **Printer**

- Card reader
- Computer console
- CRT

Question 30: Which of the following is true about primary storage?

- It allows very fast access to data
- It is a part of the CPU
- It is relatively more expensive
- **All of the above**

Operating Systems and Software

Question 10: In computer system, memory management operations are performed by:

- User
- Programmer
- Application Software
- **Operating System**

Question 19: The processes of starting or restarting a computer system by loading instructions from a secondary storage device into the computer memory is called:

- Duping
- Padding
- **Booting**
- All of above

Information Systems and Networks

Question 7: Which of the following is an operation support system?

- Knowledge management system
- Customer relationship management system
- **Collaboration system**
- Professional support system

Question 14: ABC company limited prefers to communicate with their suppliers and partners through a secured private network. Which of the following option best suits their purpose?

- **Extranet**
- Internet
- LAN
- Intranet

Question 16: Which of the following is not a management support system?

- Decision support system
- Management reporting system
- Executive Information System
- **Supply chain management system**

Question 17: The general transformation cycle for information is:

- information to data to knowledge.
- **data to information to knowledge.**
- data to knowledge to information.
- knowledge to data to information.

Question 20: Which is the device that converts computer output into a form that can be transmitted over a telephone line?

- Teleport
- Concentrator
- Multiplexer
- **Modem**

Computer Generations and Basics

Question 9: Which of the following is not an advantage of using a computer?

- Logical operations
- Reliability
- **Prone to machine defection**
- Self-operating

Question 15: First generation of computers were based on which technology?

- LSI
- **Vacuum Tube**
- Transistor
- VLSI
