ICT 2 – Revision Paper

Part 1

Choose the correct answer for questions 1 to 2 and underline it.

Answer all the questions.

1. MS Word is ____ software.

a. Web browser
b. Word processing
c. Operating system
d. Antivirus

2. Which area in an Excel window allows entering values and formulae?

a. Standard Toolbar
b. Menu Bar
c. Title Bar
d. Formula Bar

Write the answer for question 3 – 4 in the given space.

3. Write path to adding a page break to your document?

……

4. Write path to change the format into currency format of a cells range?

……

Part 2

Question 1

You are supposed to create a spreadsheet using MS Excel, by following the instructions given below.

1. Open a new workbook and save the file name **as <Your Student ID>_Q1**. (2 mark)

2. Enter the above data in an Excel worksheet in the exact cell locations as desired. Set the columns width and rows height appropriately and set labels alignment appropriately. (5 mark)

	A	B	C	D	E	F	G
1	Seasonal Discount						
2	**Item Code**	**Item Name**	**Unit Price**	**Num. of Unit Purchased**	**Total Value**	**Discount**	**Net Value**
3	SI001	Exercise Book	460	36	?	?	?
4	SI002	Water Bottle	355	60	?	?	?
5	SI003	Lunch Box	430	50	?	?	?
6	SI004	Crayon Box	684	56	?	?	?
7	?	Clay Box	390	64	?	?	?
8	?	File Holder	850	52	?	?	?
9	?	Note Book	160	80	?	?	?
10	?	Pen Holder	325	45	?	?	?
11	?	Sticky Note	492	62	?	?	?
12	?	Puncher	640	38	?	?	?
13	Highest Total Value						
14	Lowest Total Value						
15	Average Total Value						
16							

3. Fill item code column with Autofill (A7:A11) (1 mark)

4. Use “warp text” and merge cells as desired. (2 mark)

5. Apply borders for all cells in the table and a thick outside border. (1 mark)

6. Change the font size to ‘Arial Nova Light’ and bolden relevant cells (1 mark)

7. Add currency format for the cells E3:G12 with two decimal places and dollar symbols (2 mark)

8. Sort the table by item name from A to Z (2 marks)

9. Calculate the Total value: multiply Number of units by unit price to calculate Total Value (4 mark)

10. Calculate the discount as follows. (8 marks)

- If total value is less than $10000, then no discount
- If total value is $10000 or greater, and less than $20000 then the discount is 3% of total value.
- If total value is $20000 or greater, and less than $30000 then the discount is 5% of total value.
- If total value is $30000 or greater, and less than $40000 then the discount is 7% of total value.
- If total value is $40000 or greater than the discount id 10% of total value

11. Calculate the net value: enter a formula to subtract discount from total value to calculate net value (3 marks)

12. Calculate the highest, lowest, and average net value by using suitable formulas

(6 marks)

13. Highlight the net value which are below average in “Green fill with dark green text” and the above average in “Yellow fill with dark yellow text” by using conditional formatting feature.

(6 mark)

14. Use 3 flags icon set in conditional formatting to display discount (3 mark)

15. Create a suitable chart to compare the net value of purchased items and rename the chart title as “Net values” (X axis – Item Code, Y axis – net value) (5 mark)

16. Move the chart to a new sheet and rename it as chart (4 mark)

17.Create the below summary table in the same excel workbook. You must use COUNT IF and SUMIF

function to find the answers and complete the below table (marks will not be awarded for any

other methods). (10 mark)

	Answer
Number of items which have net value above 30000	
Number of items which purchased below 50 units	
Total number of items which has made in China	
Total number of items which has made in Japan	
Total net value which purchased from China
