INFORMATICS INSTITUTE OF TECHNOLOGY

Foundation Certificate in Higher Education

DOC 314: Digital Skills for Higher Education

Tutorial 1

1. Suppose that you had to explain to a member of your family or one of your closest friends the concept of an information system. How would you define it? Write a one-paragraph description in your own words that you feel would best describe an information system to your friends or family.

2. Critically evaluate the impacts of IS in organizational settings.

3. Of the five primary components of an information system (hardware, software, data, people, process), which do you think is the most important to the success of a business organization? Write a one-paragraph answer to this question that includes an example from your personal experience to support your answer.

4. Briefly explain how security threats will have an impact on the Information systems in organizational settings?

5. Critically evaluate the control mechanisms to prevent IS from the above identified security threats.
