DOC 314: Digital skills for Higher Education

Tutorial 6

Answer all 3 activities

Activity 1 - Petty Cash

1. Create a Petty Cash Worksheet as shown here.

	A	B	C	D	E
1	Petty Cash Records				
2		Milk	Postage	Stationery	Weekly Total
3					
4	Week1	2.5	3	15	
5	Week2	1.9	5	22	
6	Week4	2.8	2.5	5	
7	Monthly Total				
8					

2. Apply a currency format with two decimal places to the data where appropriate.
3. Insert a row between rows 1 and 2 and remove the blank row 4.
4. Enter formula to calculate the Weekly Total for each of the weeks.
5. Week 3 has been omitted in error. Insert a row and add the following data:

	Milk	Postage	Stationery
Week3	3.00	4.00	5.00

6. Copy the formula to this row.
7. Enter the formula to calculate the Monthly Total for each item.

8. During some weeks' coffee is also purchased. Insert a new column between Milk and Postage, and enter the heading Coffee, with the following data:

	Coffee
Week1	4.30
Week2	3.50
Week3	0
Week4	5.20

9. Copy the formula for this column.
10. You have been asked to give a rough estimate of the total yearly out-going of petty cash. Insert a new label below Monthly Total called Yearly Estimate. Insert a formula in cell B9 to multiply the Monthly Total for Milk by 12. Copy this formula across the remainder of the cells in this row.
11. Enter a label Grand Total in cell A10. Now sum the Yearly Estimate row to calculate the grand total for the year. Place this total in cell B10.
12. Format the font to Comic Sans MS 12pt.
13. Embolden the text in the row and column headings.
14. Set the width of each column to approximately width:15.
15. Format the text in column A so that it wraps within the cells.
16. Centre the heading across columns A to F.
17. Add a heavy border around the outside of the table -- apart from the heading i.e. A3:F10. Add horizontal lines between the rows containing the summary data (Monthly Total, Yearly Estimate and Grand Total).

INFORMATICS INSTITUTE OF TECHNOLOGY

Activity 2 - Confectionery Sales

1. Create a Worksheet as shown below to record confectionery sales in the student refectory. The prices are given in British pounds.

Items	Price	Number Sold				Total Sold	Sales
		Week 1	Week 2	Week 3	Week 4		
Mars Bar	0.29	55	72	65	70	Formula	Formula
Snicker	0.32	38	62	44	59	Formula	Formula
Fuse	0.30	122	54	98	84	Formula	Formula
KitKat	0.29	98	115	90	101	Formula	Formula
Bounty	0.34	65	83	65	79	Formula	Formula
Wispa	0.31	48	52	35	67	Formula	Formula
Total Sold per Week		Formula	Formula	Formula	Formula	Formula	Formula

2. Create a formula in the Total Sold column to calculate the total of each type of bar sold.
   Total Sold = number sold in week 1 + number sold in week 2 + number sold in week 3 + number sold in week 4
3. Create a formula in the Sales column to calculate the sales value of each type of chocolate bar sold.
   Sales = Total Sold * Price
4. In the row Total Sold per Week, create a formula to calculate the total number of chocolate bars sold per week.
   Total Sold per Week = Mars Bars + Snickers + Fuse + KitKat + Bounty + Wispa
5. Add two new rows at the bottom of the Worksheet and label them Minimum Sold and Maximum Sold. Create formulae in these rows to calculate the Minimum chocolate bars sold per week and the Maximum chocolate bars sold per week.
6. Format the figures in the column Price to currency with two decimal places, and the figures in the column Sales as integer (no decimals). Embolden all column titles.
7. Add one column to the right of the table, with the title: "Sales in Euros".

8. Using the exchange rate 1 GBP = 0.60 EURO. (The prices shown in the Worksheet are expressed in GBP). Create a formula to calculate Sales in EMU for each chocolate bar in the column.

   Sales in EMU = Sales * Exchange Rate (0.6)

Activity 3

Use the worksheet given to answer the questions that follow:

Expenses for the Month of January vs. Budget		
	Budget	**Savings**
Salaries and Wages	156675.00	
Rent	4300.00	
Electricity	1000.00	
Telephone	200.00	
Advertisements	20000.00	
Freight and clearing	15650.00	
Security	3800.00	

Questions

(i). Insert a new column between the Budget and Savings column.

(ii). Enter the title ‘Actual’ in cell C3.

(iii). Enter the following figures in the new column.

	Actual
Salaries and Wages	145200
Rent	4300
Electricity	1207
Telephone	142
Advertisements	18550
Freight and clearing	13400
Security	3800

(iv). Calculate the savings in cells D4:D10.

(v). Format the sheet title to Arial Black, size 14, and Bold.

(vi). Format the range B4:D10 to two decimal places.

(vii). Add the title **Savings %** in cell E3 and calculate the savings as a percentage of the budget.

(viii). Format the range E4:E10 as a percentage.

(ix). Enter the row title **Total** in cell A12 and obtain totals for Budget, Actual, and Savings columns.

(x). Copy the formula in E10 to E12.

(xi). Format the new heading to match the existing headings and Align the heading to **Right**.
