DOC 314: Digital Skills for Higher Education

Tutorial 8

Activity 1 - Create the following table

FITNESS PROGRESS CHART								
Date	Weight	Chest	Waist	Hips	Forearm	Estimated Lean Body	Estimated Body Fat	Estimated Body Fat %
5/3/2013	140	32	31	40	11.5	103.8	36.2	0.259
5/11/2013	140	32	31	39.5	11.5	103.9	36.1	0.258
5/19/2013	139	32	31	39.5	11.5	103.2	35.8	0.258
5/26/2013	138	31	30	39	11	103.4	35.6	0.256
6/1/2013	138	31	30	39	11	103.4	35.6	0.256

Fitness Progress | Challenge

Instructions:

1. Create the above chart.
2. Row height – row 1- 50, other rows- 30
3. Auto fit column width for column A to F.
4. Rename the worksheet as “Fitness Progress”.
5. Add another worksheet and rename it as “Challenge”.
6. Change the “Challenge” worksheet tab colour as yellow.
7. Change the font colors as per your wish.

Activity 2 - Conditional Formatting

Let's say you have a worksheet with thousands of rows of data. It would be extremely difficult to see patterns and trends just from examining the raw information. Similar to charts conditional formatting provides another way to visualize data and make worksheets easier to understand.

1. Open our **practice workbook.**
2. Click the **Challenge** worksheet tab in the bottom-left of the workbook.
3. Select cells **B3:J17.**
4. Let's say you're the teacher and want to easily see all of the grades that are below passing. Apply **Conditional Formatting** so it **Highlights Cells** containing values **Less Than 70** with a **light red fill.**
5. Now you want to see how the grades compare to each other. Under the **Conditional Formatting** tab, select the **Icon Set** called **3 Symbols (Circled).** **Hint:** The names of the icon sets will appear when you hover over them.
6. Your spreadsheet should look like this:

7. Using the Manage Rules feature, remove the **light red fill,** but keep the **icon set.**

Activity 3 – What-if analysis

Excel includes many powerful tools to perform complex mathematical calculations, including what-if analysis. This feature can help you experiment and answer questions with your data, even when the data is incomplete. This activity will help you to learn how to use a what-if analysis tool called Goal Seek.

1. Open our practice workbook.
2. Click the **Challenge** tab in the bottom-left of the workbook.
3. In cell **B8**, create a **function** that calculates the **average** of the sales in **B2:B7**.
4. The workbook shows Dave's monthly sales amounts for the first half of the year. If he reaches a $200,000 mid-year average, he will receive a 5% bonus. Use **Goal Seek** to find how much he needs to sell in June in order to make the $200,000 average.
5. When you're finished, your workbook should look like this:

	A	B
1	Month	Sales
2	January	$157,274.00
3	February	$187,349.00
4	March	$179,291.00
5	April	$202,025.00
6	May	$212,685.00
7	June	$261,376.00
8	Mid-Year Average	$200,000.00

Activity 4 - Sorting Data

1. Open the practice workbook.
2. Click the Challenge tab in the bottom-left of the workbook.
3. For the main table, create a custom sort that sorts by Grade from Smallest to Largest and then by Camper Name from A to Z.
4. Create a sort for the Additional Information section. Sort by Counselor (Column H) from A to Z.
5. When you're finished, your workbook should look like this:

CAMP KATONKA
NORDMAN, ID

Camper Name	Gender	Grade	Cabin Color	Counselor
Bennett Hobbs	Male	6	Blue	Hernandez
Claire Smith	Female	6	Pink	Stone
Karen Cranston	Female	6	Pink	Stone
Kia Willard	Female	6	Pink	Stone
Ricardo Gonzalez	Male	6	Blue	Hernandez
Tia Cotter	Female	6	Pink	Stone
William Krywinski	Male	6	Blue	Hernandez
Flora Jones	Female	7	Green	Gorecki
Kelly Suarez	Female	7	Green	Gorecki
Ken Crowder	Male	7	Black	Patel
Mark Messier	Male	7	Black	Patel
Priyanka Chopra	Female	7	Green	Gorecki
Taquan Holder	Male	7	Black	Patel
Brenna Alexander	Female	8	Yellow	Chang
Haruto Takamura	Male	8	Orange	Smith
Jenna Hobbs	Female	8	Yellow	Chang
John Gibbs	Male	8	Orange	Smith
Mary Clarence	Female	8	Yellow	Chang
Miles Goldstein	Male	8	Orange	Smith
Shivangi Patel	Female	8	Yellow	Chang
Susana Jimenez	Female	8	Yellow	Chang
Adir Hassan	Male	9	Purple	Assaf
Jessica Locklear	Female	9	Red	Leslie
Jordan Hargett	Male	9	Purple	Assaf
Mariela Flores	Female	9	Red	Leslie
Niall St. Clair	Male	9	Purple	Assaf
Nimah Al Masori	Female	9	Red	Leslie
Priya Dwivedi	Female	9	Red	Leslie

Additional Information

Camper Name	Counselor	Allergy	Emergency Contact
Bennett Hobbs	Hernandez	Beer, Cashews	555-862-6987
Ricardo Gonzalez	Hernandez	Dairy	555-258-2584
Mariela Flores	Leslie	Beer, Tomatoes	555-492-8721
Nimah Al Masori	Leslie	Nuts, Eggs	555-766-1602
Taquan Holder	Patel	Peanuts	555-261-4192
Kacey Cranston	Stone	Milk, Soy, Eggs	555-293-3245

INFORMATICS INSTITUTE OF TECHNOLOGY

Activity 5 - Filtering Data

1. Open the practice workbook.
2. Click the Challenge tab in the bottom-left of the workbook.
3. Apply a filter to show only Electronics and Instruments.
4. Use the Search feature to filter item descriptions that contain the word Sansei. After you do this, you should have six entries showing.
5. Clear the Item Description filter.
6. Using a number filter, show loan amounts greater than or equal to $100.
7. Filter to show only items that have deadlines in 2016.
8. When you're finished, your workbook should look like this:

	A	B	C	D	E	F
1	ID#	Customer Last Name	Item Description	Item Type	Loan Amou	Deadline
7	2045	Smith	15" Suzu Laptop	Electronics	$150.00	1/24/2016
13	2965	Haley	Milano 4/4 Size Cello with Hard Case	Instrument	$200.00	1/18/2016
14	2345	Marquez-Jimenez	Sansei Portable Gaming System Black	Electronics	$100.00	2/2/2016
19	1056	Dwivedi	1950s Steel Lap Slide Guitar	Instrument	$175.00	4/26/2016
25	4956	Gorecki	15.6" 500 GB Sansei Laptop	Electronics	$205.00	1/1/2016

Activity 6 - Groups and Subtotals

1. Open the practice workbook.
2. Click on the Challenge tab in the bottom-left of the workbook.
3. Sort the workbook by Grade from smallest to largest.
4. Use the Subtotal command to group at each change in Grade. Use the SUM function and

add subtotals to Amount Raised.

5. Select Level 2 so that you only see the subtotals and grand total.
6. When you're finished, your workbook should look like this:

		A	B	C	D
	1	First Name	Last Name	Grade	Amount Raised
+	8			8 Total	$311.00
+	15			9 Total	$583.00
+	22			10 Total	$432.00
+	29			11 Total	$345.00
+	35			12 Total	$240.00
−	36			Grand Total	$1,911.00
