DOC 330: Designing Innovative Solutions

Tutorial 3 – Problem Identification

Activity - I

We are using many applications in our day today life. Please specify 2 applications and identify the problems through answering the below questions.

- Why do you think there is a problem?
- What is happening?
- When is it happening?
- Where is it happening?
- Who do you believe is involved?
- Why is it happening?

Also we can identify by applying the following steps:

- Identify the issues. Be clear about what the problem is…
- Understand everyone's interests. ...
- List the possible solutions (options) ...
- Evaluate the options. ...
- Select an option or options. ...
- Document the agreement(s). ...
- Agree on contingencies, monitoring, and evaluation

Activity II - Working on your group coursework

Topic: Problem Identification & Idea Generation Techniques

Tasks: Problem Identification – Steps to Follow

- Identify a problem that needs to be solved by implementing an IT solution.
- The scope should not be too small.
- List down the main features you need to implement.
- Prepare a simple document indicating the following;
    - ✓ Problem identified
    - ✓ Solution
    - ✓ Features

Help: You may use Brainstorming and Mind mapping techniques for idea generation.
